

Welcome to

designbook.me

Quick tips on using designbook platform to brand  
your business

For Suppliers and Retailers

# 1. Creating and updating your profile

Be at the right place at the right time...365 days a year!

**Your professional profile on designbook is your interface.** Completing your details including your business description, country, contact person, contact email and numbers will make it easier for clients to reach you.

- ✓ You can choose up to 2 business lines to be found under.
- ✓ Make sure to fill in your public profile name. Once it is filled in it can't be changed (e.g. [www.designbook.me/@yourcompanyname](http://www.designbook.me/@yourcompanyname)). You can use this link on your website, publications, brochures, business card or facebook page. When your fans click on this link it will take them directly to your professional designbook profile.

# 2. Uploading your photos

**Your photos are your branding tool.** Your work and designs are of a great quality, let your photos talk on behalf of you!

- **Upload high quality photos** only with a width of not less than 1000 pixels to guarantee full utilization of various screens. For vertical photos, width could be less than that, however, landscape photos (horizontally taken) are the best. If you have finished projects and you need to take professional photos, please contact us, we would be glad to help!
- **Upload photos of finished products\projects only.** Whenever possible avoid having people appearing in your photos, workers tools, aggregates, etc. you can upload photos of before and after, however make sure to mark them as before and after in the description or have them merged into one photo.
- **Formats accepted are JPEG, PNG or GIF.**

**Create Your Professional Profile**

This information will be displayed on your professional profile page in the Designbook directory:

Upload Profile Photo:  de  
We recommend a photo of you or your staff. If not available, upload your business logo.

Category:  
 Home Appliances  Bedding & Fabrics  
 Building Supplies  Carpets, Tiles, Marble & Flooring  
 Doors & Windows  Pools & Fireplaces  
 Furniture & Accessories  Garden & Landscape Supplies  
 Kids & Nursery  Baths  
 Lighting  Plastic Wood

Public Url Name: <http://www.designbook.me/@designbook>

Professional/Firm Name:  Your company name or your name

اسم الشركة:

Email to be Displayed:

Web site:

Contact Details

First name:

Business Description:

Certification and Awards:

Address:

- **Make sure to complete the form of uploading including filters.** Having photos uploaded under the right filters, inserting descriptions and notes will increase chances of clients finding your photos.
- **Products prices are so important for clients.** Listing prices of your products, whenever possible, helps client to take the decision of contacting you. You have a special box for prices related to each product photo you upload. Highlighting the availability, quantity and any other product detail will make a big difference to potential clients.

\*To maintain pleasant experience to viewers, kindly note that uploaded photos should not contain logos, contact numbers, or any direct promotion text or tags.

### Upload Project

**Project Description**

Project

\* Type

\* Product

Style

color

Country:

City:

Price

Description

Keywords

Photo credit

Which project was it part of?

Residential  Commercial  products

What is the product?

What is the style of this style?

What is the style of this color?

Jordan

Amman

Price

What is the space?

Select Photo to...

3. **Select Photo Files**

**SELECT**

You can select multi photos to be uploaded together.

\* The systems takes any photo size. For faster upload we recommend photos size not to be between 0.5 MB and 2 MB. If you have photos exceeding 3 MB

This is a mandatory filed. You can add a new project or simply add photos to an existing one

Being specific in listing your photos under the right filters (product, color and country) makes users find your products easily at the right place. Also, having your filters done right increase your photos chances to appear in search.

Tell users about this photo, product, or special ideas or concepts

You can insert key words to have better chances to be found when users search for specific words (e.g. modern kitchens, wall paper, and fireplaces). If your photo contains more than one product, you can add key words from the box above and your photos will appear under more than once category (e.g. your photo mainly shows a bathroom set. Choose sinks from the box and it will be also shown under sinks

You can credit photos to another professional such as a photographer. Other professionals who have worked

---

## 4. Market your work and knowledge

Showcase your work and have an all-time branding.

**Designbook is not only a catalog for designs and products, it is an education tool as well through which you can educate users about your field of knowledge, create trust and credibility link between you and the users.** You can do that through various ways:

- **Feature Your Products and Solutions.** If you have a product or a special solutions that is important, you can feature it on the home page. Drop us an email and we will be glad to make it featured.
- **Create a designbook** of your own focusing on an idea, product use, tips or a solution you like highlight. For example, you can create a designbook from different product you have uploaded focusing on product use, materials, deploying solutions, etc. Such designbook would benefit potential users/clients and will drive them to initiate business contacts with you.
- **A wonderful way to brand your expertise,** Each photo has a question option, through which, potential clients come to you and knock your door. A user might have a specific question on one of your products, the question will appear on the photo and you will be notified. Your answer will appear under the question so you will end up having a special blog under each photo.
- **Your own profile link** is there to bring clients to your profile page. You can send your link to clients and they will come directly to your profile page. The links are easy and direct e.g. [www.designbook.me/@your\\_company\\_name](http://www.designbook.me/@your_company_name)
- **Create your own followers tribe.** Users can follow you through the FOLLOW feature. This is a great tool to keep your followers updated of your new products, ideas and work.
